Beer

The beer at Papaz is special, just like our concept, and it has been thought about.

Gulpener 'the free brewer' is an independent family brewery from Limburg, which has been marketing beautiful specialty beers in various flavours since 1825. The brewery takes the liberty not to flatten the taste of beer, but to enrich it and to constantly look for innovative tastes. You will find the experience of 8 generations of brewers in our beers.

Water at Papaz

Papaz still water or sparkling Glass	2,00
Papaz still water or sparkling Bottle	3,90

At Papaz we strive for sustainable business. One of the projects in which Papaz is participating is the ECO-tap concept.

Thanks to this concept, our table water is local, pure and safe. We serve tasty table water to every guest, still and sparkling. In this way we save unnecessary transport of water from a bottling company elsewhere in Europe, which is transported to wholesalers and it is no longer necessary to dispose of (plastic) bottles. In addition to being environmentally conscious, we at Papaz believe that safe drinking water must be available to everyone.

Therefore, we serve 'water for water'. With every bottle of water that we sell to you, we help make clean and safe drinking water available in Kenya. The roofs of the houses are replaced by metal roofs that are suitable for collecting rainwater. That rainwater is filtered, stored, cleaned with the ECO-tap filters and used immediately. In this way we do not extract valuable water from the vulnerable groundwater level and we make more safe drinking water available for everyone.
