Lebanon red wine from the Holy Land

Château Musar, Gaston Hotchar

The 2003 harvest can be summarized in two terms: alcohol & acidity. This vintage is rich in both. After a rainy winter, no more drops fell from mid-April and it became hot and sunny. In May, when flowering began, a 10-day heat wave reduced the harvest. The wines spent a year in oak barriques in Nevers, France. The three varieties - Cabernet Sauvignon, Cinsault and Carignan - displayed strongly contrasting aromas. The final blend rested in barrels for another 6 months before being bottled and transferred to the Château Musar cellars, high in the Mountains near Ghazir, to begin the journey of maturing and development.
